

N2010

5th International Nitrogen Conference 2010

3rd - 7th December, New Delhi, India

Reactive Nitrogen Management for Sustainable Development - Science, Technology and Policy

Venue : The Ashok, New Delhi

Organized by : Indian Nitrogen Group (ING-SCON) & International Nitrogen Initiative (INI)

Website: <http://www.n2010.org>

Trade Exhibition

Dear Friends

On behalf of the organising committee of N2010 the **5th International Nitrogen Conference** we take pride in inviting the Fertilizer, Chemical, Automobile, Laboratory Instrumentation, Pollution Control and Medical Industry to participate in this landmark event. This important international conference held triennially is taking place first time in India in New Delhi. In the last four decades the country has achieved food security and nitrogen input through fertilizers has made this possible. Also during this period India has taken a quantum jump in use of energy both in industry and transport sector mainly through the use of hydrocarbon and coal resources. All these processes cause leakage of reactive nitrogen to ecosystems which impacts the environment, ecosystem services & biodiversity, climate change and human health.

The main focus of this conference is '**Reactive Nitrogen Management for Sustainable Development – Science, Technology and Policy**'. The service rendered to the agricultural practitioners (farmers) and professionals, researchers, scientists, academics, policy makers and regulators communities by the industry has always been significant and has primarily been responsible in achieving the milestones in food and energy security and human health. This has increased the need for more interaction between these communities and the industry. N2010 gives one such opportunity for interaction. We are leaving no stone unturned to achieve this and to live up to the expectations of delegates, sponsors and exhibitors. In order to achieve this goal we have chosen Hotel Ashok Convention Centre as our venue, which is one of the best convention centre in the country.

Delhi being the Capital offers the entire necessary infrastructure required for a preferred destination for this kind of conference. The approachability, ample accommodation, the historical ambience, the cultural mix, the academic and research institutions, the software and finance industry, all these add to the attractiveness of Delhi as the best destination in the country. Keeping all these incentives in view, we have enlisted several reputed International and National professionals in academia, science, engineering, industry and policy to be peers of this conference. We are expecting around 350 international delegates and around 400 from India for this conference.

The conference will have Keynote and Plenary talks by leading international and national speakers and 30 technical sessions. Also few special sessions and symposia are being organised as side events (Organic N in the soil-plant-microbe nexus - Role of organic N in natural and bio-production systems, FAO Session on Nitrogen use efficiency in animal food chains, IPI Session on 'N-K Interactions for Improved N Use Efficiency', Functional Plant Biology of Nitrogen Metabolism and Nitrogen Use Efficiency, Nitrogen budget and nitrogen accounting methods and applications and Nitrate and Human Health. A NASA workshop on Land Use-Ecosystem-Climate Interactions in Monsoon Asia and Second meeting of UNEP-GPNM on Global Partnership on Nutrient Management is also scheduled with the conference.

The Exhibition will offer an unparalleled opportunity of maximum quality exposition of industry in a very comfortable ambience of Hotel Ashok. We shall ensure excellent facilities, good interaction and full satisfaction to all the participants and industry representatives.

Thanking you all
